WATER SUPPLY

Subject of Conference Between State and City Officials on Friday.

Friday morning a conference relative to the water supply in the city of Willimantic was held in the office of City Clerk A. C. Scripture, at which Dr. Townsend, secretary of the state board of health, State Chemist James H. Newlands, Mayor D. P. Dunn, City Health Officer Dr. W. P. Keating, Superintendent of Schools J. M. Yousang, of the water department and Aldermen Whitmore, Case and O'Connor, members of the water supply committee on water, were present.

The question was discussed at some length by the experts and much useful information was acquired by the city officials relative to the matter. It was pointed out, and most urgently, that some provision for safeguarding the public health should be made as soon as possible. The water supply, above all things, should be kept free and clear of all contamination. Various propositions were freely discussed. The storage of water, the most costly at the outset, but probably the least expensive during a long term of years; the chemical process for the purification of the water supply, less expensive to install, but more expensive to maintain, and the sand filtration process, the least expensive of any one of the three most feasible systems. The visiting gentlemen would not advise the city officials which system to adopt, but said that it was something that must be decided upon for all time and a matter that deserved careful study of local conditions. State Chemist Newlands admitted that no typhoid germs had ever actually been found in the samples of the city water, but that in view of the circumstances and present conditions that something must be done to forestall a contingency that might arise. "The main thing," he said, "is to guard against the possibility of contamination and be prepared." The gentlemen suggested the employment of a sanitary engineer to look into the existing conditions throughout the water sheds and report with suggestions. Prof. Newlands said that where a water supply was fed from so large an area there was more likelihood of contamination, and it was also consequently more difficult to locate and eradicate any contamination that might exist. The matter will be given careful and earnest consideration by the city officials.

Two weeks ago I saw your liniment in a drug store and got a bottle to try. The first application caused instant relief, and now except for a little stiffness, I am almost well."

An Appeal to Wives
You know the terrible affliction that comes to many homes from the result of a drinking husband or son. Know of the money wasted on "drunk" that is needed in the home to purchase necessities, clothing, food, and pay thousands of drinking men. It is a home treatment and can be given secretly or taken voluntarily. Put up in two forms, powder or pill. Your money will be returned if after a trial it has failed to benefit. Costs but \$1.00 a box—a mere trifle compared with the amount of a drinking man's bill spent in a day for liquor. Come in and get a free booklet and let us tell you of the good ORPINE is doing.
